

7TH GENERATION ROBOT BARISTA

THE ROBOT BARISTA

Specialty-grade coffee, brewed entirely by a machine — 54 seconds a cup, zero human hands, running 24/7.

PATENTS

— THE OPPORTUNITY

COFFEE IS BOOMING. THE CAFÉ MODEL ISN'T.

Demand for quality coffee keeps climbing — but the traditional café that serves it is expensive, inconsistent, and hard to scale. Four structural costs cap every location.

70%+

Cost is people & rent

Wages, rent and fit-out dominate café P&L, squeezing margins on every cup.

~8–10h

Limited hours

Staffed hours cap revenue. Peak queues turn customers away; off-hours sit idle.

Varies

Inconsistent cups

Taste swings with the barista, the shift, and the day. Quality is hard to standardize.

Slow

Hard to scale

Every new site means hiring, training and build-out — capital and time intensive.

— MEET COFE+

A FULL CAFÉ THAT RUNS ITSELF.

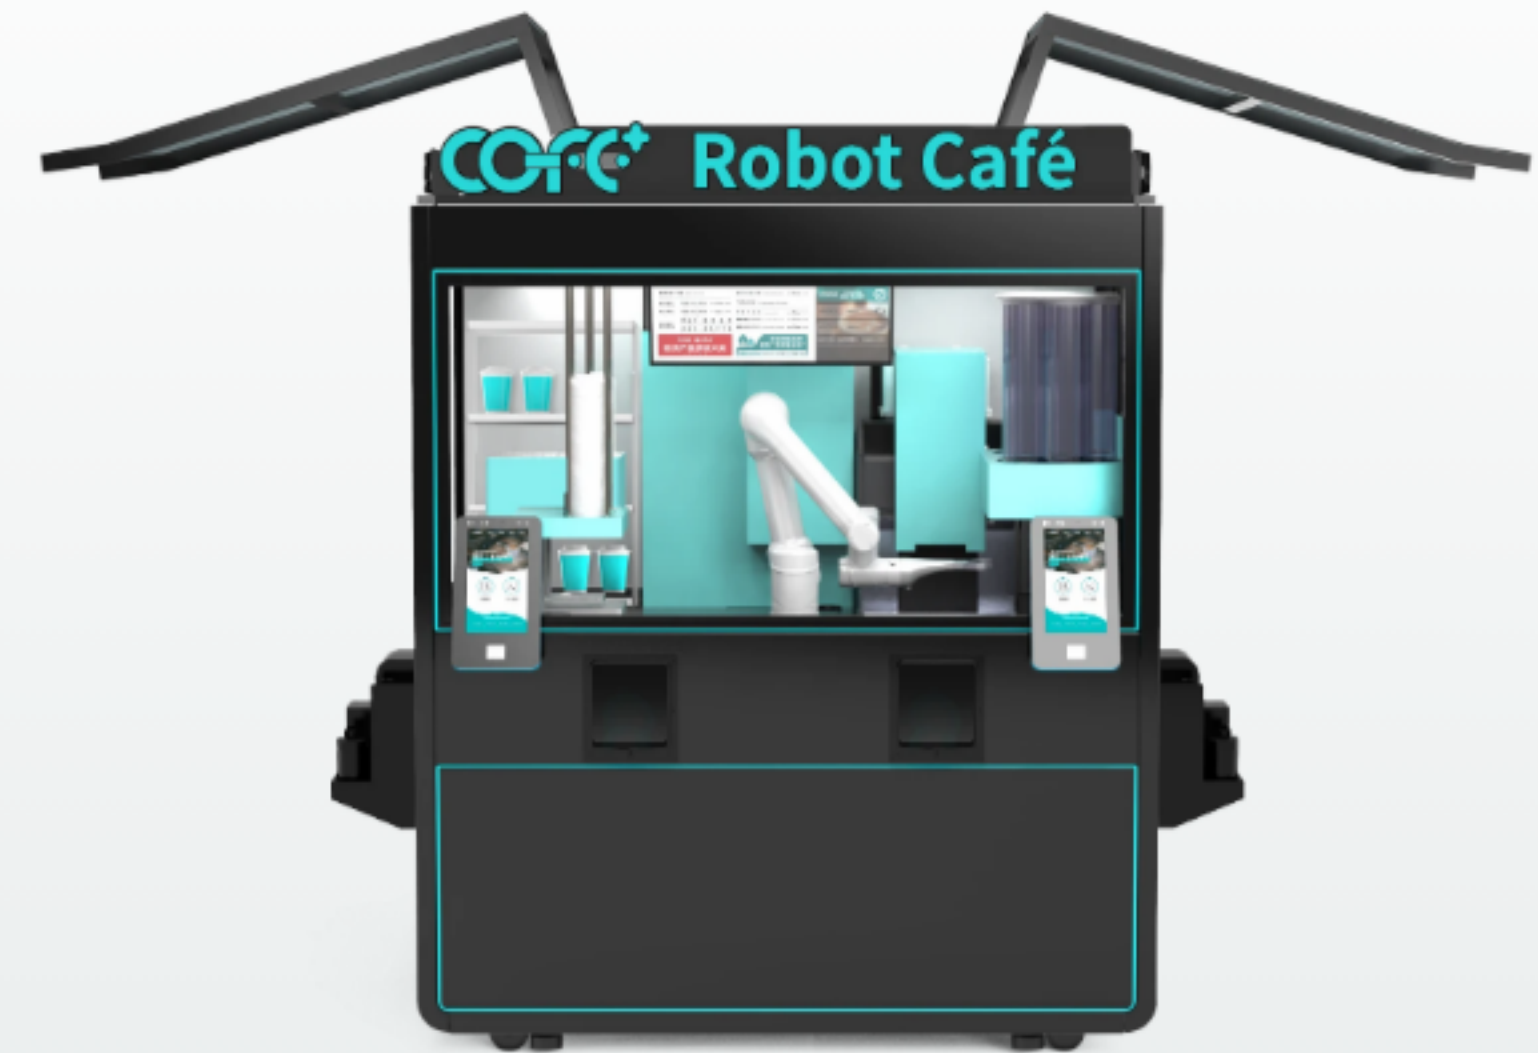

COFE+ is a fully autonomous robotic café. A multi-axis robotic arm grinds fresh beans, pulls espresso, steams milk, finishes latte art and serves — with no barista on site. One compact unit replaces an entire coffee bar.

Autonomous · no staff on site

24/7 · always open

2.35m' · fits anywhere

Cashless · app & screen ordering

Fully enclosed robotic café — dual self-order screens, central barista arm, grab-and-go pickup lockers

— SPEED & THROUGHPUT

BUILT FOR THE RUSH.

A patented smart algorithm lets the arm build up to five cups at once — sustaining café-level volume without a queue, around the clock.

54s

Average per cup

Grind, brew, finish and serve in under a minute.

5

Cups at once

Parallel builds in a single 50–55s cycle.

1,000

Cups per day

Proven throughput in real deployments.

24/7

Always on

No shifts, no breaks, no closing time.

DAILY CAPACITY VS. A STAFFED TWO-BARISTA BAR

— MAN VS. MACHINE · SHANGHAI HONGQIAO

IT BEAT ELITE BARISTAS.

In a live showdown at Shanghai's Coffee Culture Festival, the 7th-gen COFE+ went head-to-head with a TOC-grade competition judge on three cups.

ELITE HUMAN BARISTA

3:35

Three cups · 71s per cup

VS

7TH-GEN COFE+

2:43

Three cups · 54s per cup · ~1.3× faster

0.3%

Error rate

Weight deviation of just $\pm 0.8\text{g}$ across cups — repeatable to the gram.

100%

Consistency

Every cup identical: same dose, same temperature, same pour.

1.3×

Faster

Quicker than a championship judge — while multitasking five builds.

— A MENU WITHOUT LIMITS

300+ DRINKS. 8 CATEGORIES. 5,000+ WAYS TO CUSTOMIZE.

From freshly ground espresso to matcha and plant-based lattes — with signature recipes drawn from 197 countries, and strength, sweetness, temperature and toppings all dialed in per order.

- Fresh-ground coffee
 - Plant-based milks
- Milk tea
 - Coffee–tea blends
- Matcha
 - Latte art
- Chocolate
 - 3D-printed foam

- 197 country recipes
- 2–4 milk types
- 6–8 syrups
- 4–7 toppings

SIGNATURE MOVE

Latte art & photo-quality 3D foam prints

Hand-poured tulips and hearts, plus high-resolution images printed right onto the crema.

— UNDER THE HOOD

ENGINEERED TO THE GRAM.

Every subsystem is purpose-built and orchestrated by an on-board smart algorithm — so quality never depends on who's working.

01

Multi-axis robotic arm

Proprietary arm executes grind, tamp, brew, steam and pour — and hand-poured latte-art patterns.

02

Dual bean hoppers

Two hoppers run multiple bean varieties, so espresso and single-origin live side by side.

03

Modular ingredients

2–4 milks, 6–8 syrups and 4–7 toppings combine into thousands of made-to-order drinks.

04

High-res 3D foam printing

Prints photo-quality images directly onto milk foam — logos, faces, seasonal art.

05

Smart algorithm

Schedules up to five parallel builds and holds $\pm 0.8g$ precision on every pour.

06

Remote monitoring

Cloud dashboard tracks stock, sales and health — one operator oversees a whole fleet.

07

UNIT ECONOMICS

UP TO 90% LOWER
OPERATING COST.

	TRADITIONAL CAFÉ	COFE+ ROBOTIC CAFÉ
Staffing	3–6 baristas per site	1 operator monitors 10 units
Hours	~8–10 hrs, staff-limited	24 / 7, fully unattended
Footprint & fit-out	40–120m², heavy build-out	2.35m², plug-and-serve
Daily upkeep	Cleaning, prep, cash-up	~15 min restock per unit

90%

Lower opex

Less wage, rent and fit-out per cup.

10:1

Units per operator

One person remotely runs a fleet of ten.

15 min

Daily restock

The only on-site task, once a day.

— FITS ANYWHERE · SIX FORM FACTORS
